A nighttime cityscape featuring a prominent, illuminated skyscraper with a grid-like facade. The building is lit up with blue and white lights, standing out against the dark blue night sky. Other smaller buildings and structures are visible in the background, some with warm yellow lights. The overall scene is a dense urban environment.

HI THERE!

Based in Malaysia, Api Fire Engineering Sdn Bhd provides a comprehensive fire safety solution. They offer a wide range of fire safety equipment, from fire extinguishers to fire alarm systems, ensuring you have the right tools to combat any blaze. Their certified technicians can install these systems according to regulations, and provide regular maintenance to keep your equipment functioning perfectly in case of an emergency.

ABOUT OUR COMPANY

Api Fire Engineering, a Malaysian fire safety leader, provides complete fire protection under one roof. Led by industry veteran KF Wong, who boasts over twelve years of experience, Api Fire Engineering offers unparalleled expertise. Wong's specialty lies in sprinkler systems, hose reel systems, and fire alarm systems, ensuring your building adheres to the strictest safety codes. His team meticulously installs these systems, meeting all regulatory requirements.

Furthermore, Api Fire Engineering boasts a comprehensive fire equipment supply, providing extinguishers, fire blankets, and signage to fully equip your space. They even streamline the often-complex process of applying for fire safety authority approvals, ensuring your building remains compliant and hazard-free. With Api Fire Engineering, you can rest assured your property and loved ones are protected in the face of a fire emergency.

OUR VISION & MISSION

VISION

To be the preeminent fire safety engineering company in Malaysia, recognized for our unwavering commitment to safeguarding lives and property.

MISSION

Api Fire Engineering is dedicated to providing comprehensive fire protection solutions. We achieve this by:

- Offering a diverse range of top-quality fire safety equipment, including sprinkler systems, hose reels, fire alarms, extinguishers, and signage.
- Employing a team of highly skilled and certified technicians for meticulous installation and maintenance of fire protection systems.
- Streamlining the fire safety approval process, ensuring our clients' buildings meet all regulatory requirements.
- Prioritizing exceptional customer service, offering ongoing support and education to empower clients in fire safety preparedness.

Through these efforts, Api Fire Engineering strives to create a safer future for all Malaysians.

MEET THE DIRECTOR

KF Wong

KF Wong is a seasoned fire contractor with over a decade of experience in ensuring the optimal safety and operation of commercial facilities.

Expertise:

- **Fire Safety Systems:** Possesses in-depth knowledge of fire safety systems, including design, construction, installation, and maintenance. He has a proven track record in overseeing fire alarm systems, sprinkler systems, fire doors, and emergency lighting.
- **Facility Management:** With a strong foundation in facility planning, maintenance, and resource management, he excels at optimizing facility performance. He prioritizes creating a safe and productive work environment for occupants while managing budgets effectively.
- **Project Management:** Actively participates in construction tenders, manages design-build projects for fire systems and emergency equipment, and ensures compliance with specifications and cost constraints.
- **Technical Expertise:** Skilled in scrutinizing testing and commissioning of fire safety systems, ensuring their proper functionality. He also facilitates the crucial process of acquiring approvals from local authorities, including Construction Completion Certificates (CCC), renewals, and Fire Safety Certificates (Surat Pelepasan).
- **Client Communication:** Prioritizes clear communication and collaboration. He actively consults with clients, provides follow-up support, and ensures a smooth experience throughout the project lifecycle, including the warranty period and ongoing maintenance.
